GDEH GRAND ROUNDS PRESENTS:

ONE HEALTH, ECOHEALTH, AND PLANETARY HEALTH PERSPECTIVES ON ECOTOXICOLOGY

**WEDNESDAY, NOV 11TH
12:00 - 1:00PM**

**ZOOM ID: 961 5398 5708
PASSWORD: 659557**

Toxic chemicals flow through the world, affecting both wildlife and human populations. Research describing the interconnected health of human and animal populations has been conducted within a variety of related theoretical frameworks including One Health, EcoHealth, and Planetary Health. This presentation highlights some of Dr. Matthew Gribble's ecotoxicology research grounded in these frameworks, and highlights some of the opportunities for Emory trainees to get involved in this research program going forward.

**MATTHEW GRIBBLE, PHD
ASSISTANT PROFESSOR
