

Vision: To serve as an intellectual hub in the advancement and translation of exposome research to improve human health

Mission: Learn how the exposome affects health and community well-being and how to best use that knowledge to improve human health

Long Term Goals

Advancing exposome research strategies, approaches, and tools	Leadership in exposome science with impact	Ensuring equity	Developing the next generation of leaders
---	--	-----------------	---

Center Aims

 Aim 1: Exposome Research Resources	 Aim 2: Exposome Research Innovation and Translation	 Aim 3: Community Engagement	 Aim 4: Career Development
---	--	--	--

Short Term Goals

Provide resources and support	Serve as source of knowledge	Enhance community engagement and access to resources	Evaluate impact	Cultivate new scientists	Grow the research base
-------------------------------	------------------------------	--	-----------------	--------------------------	------------------------

Center Components and Functions

 Integrated Health Sciences Facilities Core	 Environmental Health Data Sciences Core	 Pilot Project Program	 Community Engagement Core	 Administrative Core
Operationalize	Enable and Interpret	Innovate	Define and Apply	Coordinate and Evaluate
