

“Air Pollution and Breast Cancer: Understanding Exposure Mixtures and Underlying Mechanisms”

Alexandra White, PhD
Stadtman Investigator,
Environment & Cancer
Epidemiology Group, NIEHS

Tuesday, May 4th

12:00 - 1:00 P.M.

RSVP [Here](#) for Zoom Information

Questions: katehodgins@emory.edu

Dr. Alexandra J White received her BA from Kenyon College (2009) and her MSPH (2012) and PhD (2015) in Epidemiology from the University of North Carolina at Chapel Hill. She is currently a Stadtman Investigator in the Epidemiology Branch at the National Institute of Environmental Health Sciences. Dr. White is an environmental cancer epidemiologist whose overarching research interest is in the role of environmental exposures on the risk of women’s cancers and underlying biologic mechanisms. Her work incorporates geospatial-based exposures, including criteria air pollutions and hazardous air toxics, as well as biomarkers of chemical mixtures such as metals. Dr. White is a Co-Investigator on the Sister Study, a large prospective cohort of over 50,000 women across the US who are followed for their risk of cancer and other chronic health outcomes.
